

Electronics

Electronics

• Description:

A DC to DC converter specifically designed to power a ventilator from the wheelchair's batteries, the power center eliminates the need for any additional ventilator batteries. It provides safe, stable DC power to a ventilator all day long. It will even automatically charge the ventilator's internal emergency battery while the wheelchair is charging. (Ventilator dependent)

• Tech Specs:

Input: 24volts
Output: 12volts, 15amps

• Description:

The Lighting System includes:

- 2 White lights
- 2 Red lights
- 1 Black Jack switch
- 1 Wiring harness

The IllumiRay is a compact 12volt solid state light. It does not get hot during operation or drain your chair's battery.

The Black Jack switch is perfect for powering up to 4 IllumiRays. It has a switch on the box as well as a 3.5mm audio jack that can be used to connect any other preferred switch.

Light up a manual wheelchair by using our small NI-CD Battery Pack.
