

PowerTech Sigma

The PowerTech Sigma eliminates the need for additional ventilator batteries. It provides safe, stable DC power to a ventilator all day long. It will automatically charge the ventilator's internal emergency battery while the chair is charging.

Additionally, we have added a high current USB charger, which allows users to charge any USB device including power hungry tablets.

The PowerTech Sigma has dual input jacks and an output jack located in the back that makes hooking up the power center easy.

Always order with 2 cables:

Output Ventilator Dependent

Input Choose a style:

- Battery ring terminals
- Anderson connectors
- Joystick charging port

Auxiliary -Automobile Charging
The Sigma can draw power from a vehicle's 12 Volt aux port to preserve wheelchair and ventilator battery life on long road trips.

Battery Cable

Anderson Cable

Joystick Charging Port Cable

Auto-Aux Cable
